New England's Popular Gladiolus Farm

SEABROOK

NEW HAMPSHIRE

INTRODUCTION

1934

We wish to take this opportunity to thank our many friends and customers who have helped in the success we have achieved and we will strive to give both new and old customers the same excellent quality and service, as in the past, during the coming year. Also may we extend our appreciation of the many complimentary letters received through the year of 1933.

Our light, sandy soil is well adapted for growing the very highest quality of Gladiolus bulbs and reports received from everywhere—England, Australia, Germany, Holland, Canada, Cuba, and California—give ample testimony that our vigorous New England grown stock can be grown successfully in all climates.

In this catalog you will find the finest of exhibition and garden varieties listed at very reasonable prices, every variety being tested and grown by us and found worthy.

THRIPS—Hundreds of people visited our fields this past season and remarked on the beautiful sight displayed. We also would like to add that many of them mentioned that they saw no signs of thrips while going through the gardens.

Visitors are cordially invited from July 15th until frost to enjoy our massive gardens of Gladiolus and it will well repay you for the trip to come and see what a gorgeous sight these blooms present.

We are located on the U. S. ROUTE 1 on the main highway to Portsmouth, seven miles from Newburyport, Mass.

Sincerely,

SEABROOK NURSERIES,

Seabrook, N. H.

CARE AND CULTURE OF GLADIOLUS

BULBS should not be planted until corn planting time, as nothing is gained by planting before the ground is warm.

Select a sunny location away from roots of trees and shrubs. In localities where summer is extremely warm, a partially shaded situation is preferable. If your soil is heavy, plant four inches deep, and if light, six inches, having bulbs five or six inches apart.

Place bulbs in a well worked trench in staggered or zigzag row— . . . and cover at first with about two inches of loam; when shoots begin to appear, work balance of loam into the trench. At all times keep the soil loose. As an aid to producing larger blooms work in fertilizer around the plants when about a foot or more in height and never at planting time. At the time flower spikes appear abundant watering is very beneficial.

Bulbs should be dug as soon as you note the leaves turning yellow. Cut stem off half an inch above bulb, spread them out to dry for two or three days in a sunny location and then place in an open shed or room for two weeks or more before storing them away in a cool, dry cellar. Keep them spread out and not over three inches deep. It is a benefit to give bulbs an occasional sunning or airing during the winter.

When cutting the flowers be sure to leave at least four leaves remaining on the plant. Positive injury to the blooming qualities of the bulb for the following year will occur if this precaution is not heeded.

If you want the blooms for cut flowers, cut the spike when first bud fully opens. The remaining buds will open nicely and give you a longer period of bloom and greater enjoyment.

Remove wilted blossoms, change water and cut off small portion of the stems each day.

CONTROL OF THRIPS

As the control of Thrips seems to be a nationwide topic, we are issuing the following statement, knowing that if the proper care is used, the gladiolus can be grown in the future just as successfully as in the past. This pride of summer flowers will demand more care and attention until the insect is well under control, if not eliminated. Growers who were troubled with it two years ago, by proper treatment last spring, had very little Thrips in their garden this past summer.

The Thrips found on the gladiolus during the past two years appear to be black with cream colored wing bases, having a banded appearance and are about 1-16 inch in length. This plant provides a wonderful hiding place for Thrips as they live inside the folded leaves and florets unnoticed by some until the flower droops, others may observe a silvery sheen on the leaves where the insect has sucked the juice out of the leaf, during the very early stages of the plant.

The control of the insect must be done mostly through the treatment of the bulbs, during the storage period, for they will live over on the bulbs, if kept in a warm temperature.

At digging time, the tops should be removed, being very careful not to shake the tops over any of the stock, and burned.

Bulbs should be stored in a room where the temperature is no higher than 45 or lower than 32 degrees. Two months before planting time, sprinkle Napthalene flakes at the rate of 1 pound to 1000 bulbs or 1 ounce to about 100 corms among the bulbs and allow fumigation to continue until the corms are planted.

As another precaution, soak the bulbs in lye at the rate of one can of lye to 25 gallons of water for 12 hours just before planting. This will kill any insect on them and will aid in preventing scab or rot. This solution must not be used any stronger.

There is little that can be done to control the attack of this insect in the garden. A garden which has had gladiolus for years, with never a sign of Thrips may be infested by a person bringing it on his clothing. High winds will carry them from a neighbor's patch to yours. Infested bouquets of flowers may be taken from one state to another. Careful inspection of plants should be made once a week, by folding back the leaves to determine whether any thrips are present. The flower spikes should be inspected also as they form. Start inspecting the minute they come out of the ground.

If thrips should appear, use a weekly spray of one rounded tablespoon of Paris green, two pounds of brown sugar and three gallons of water well mixed. If a stronger solution is desired, which is harmless, use 2 tablespoons of Paris green instead of one, to the same mixture. Some have substituted cheap molasses in place of brown sugar, which is good. The solution must get into the folded leaves to do the most good. Should thrips appear in the young flower spikes, cut them down to four to five inches above the ground and burn them. Then spray with the Paris green mixture the remaining stalk.

Sometimes where the gladiolus plant has been well watered, keeping the soil fairly moist, the plant will grow rapidly enough so that it has time to bloom before the thrips could injure it.

Pass this information along to your neighbors and friends who are lovers of gladiolus that they, too, may help destroy this pest.

SEABROOK NURSERIES GLADIOLUS

Our successful harvest last Fall presented fine, plump, healthy stock, free from disease and injurious insects, which enables us to supply our customers with A-1 quality Gladiolus bulbs at very low prices.

Beside the originator's name, we have listed the approximate flowering season of each variety as follows:

E—Early, under 70 days from planting.

EM—Early Midseason, 70-80 days from planting.

M—Midseason, from 80-90 days from planting.

LM—Late Midseason, over 90 days from planting.

The large bulbs that we offer are 1¼ inches and over in diameter; medium size are 1 inch to 1¼ inches; and small bulbs ½ to ¾ inches.

L—Large. M—Medium. S—Small. Blts.—Bulblets.
3-4 or 6 may be purchased at the 12 rate.

For larger quantities see Wholesale List. Special Quotations given on request.

1934 - WHOLESALE LIST - 1934

On page four of this section we have listed gladiolus bulbs in the first four sizes and bulblets. We have No. 5 and No. 6 bulbs in stock and will be very pleased to quote you prices on these, if preferred.

If out of a certain size ordered, we will send the next nearest size, giving you good count for the money allotted to that particular variety. Whenever possible, please specify second choice in variety.

We have many other varieties, in various sizes, which are not listed due to lack of space. Therefore, should you find your particular needs eliminated, do not hesitate to write us, sending your list of gladiolus preferred together with quantity and size of each and we will gladly quote you. We always try to please our customers.

If you want a nice collection of bulbs and would rather have us select them, send your money and specify what colors you like best. Leave the rest to us and we know you will enjoy the blooms this summer.

DO NOT MIX ORDERS AT PREPAID PRICES with the F. O. B. LIST. If this is done, it will be necessary for us to ship your order f. o. b. Seabrook, N. H.

All bulbs guaranteed true to name, free of disease and up to size in grading.

SEABROOK NURSERIES GLADIOLUS

LOS ANGELES (EM) Houdyshel

Delicate pink with cerise feather in throat. The so-called "cut and come again" variety owing to its being known to produce side shoots after the main spike has been cut. Tremendously popular as a high grade cut flower. **Per dz. L 50c. M 25c S 15c. 100 Blts. 15c.**

LOUISE (LM) Wright

Large, fully open bright lavender blooms with wine colored blotch in throat. Everybody's favorite. **Per dz. L 40c. M 20c. S 15c. 100 Blts. 15c.**

LOUIS HEMON (M) Lemoine

A great novelty. Very showy. Three inner petals yellow. Outer petals yellow at base and tips salmon to red. Often flaked. Must be seen to appreciate. **L 10c ea., \$1.00 doz. M 50c dz. S 30c dz.**

LOYALTY (M) Austin

A large, ruffled deep golden yellow. Tall, strong growing gladiolus. **L 10c ea., \$1.00 dz. M 50c dz. S 30c dz.**

MAIDEN'S BLUSH (E) Grulleman

A fine primulinus hybrid. The color is a delicate shade of pink. The blooms are wide open and are carried on long, graceful stems. **Per dz. L 40c. M 20c. S 15c.**

MAMMOTH WHITE (M) Pfitzer

MR. LOUIS G. ROWE (LM) S. N.

Introducing another Aristocrat to our gladiolus family. In bud, this flower has a pale green cast over pale yellow. Buds burst open with a beautiful blending of a throat of yellow, graduating to a cream edged petal which is overlapped with blush pink, a silvery sheen being cast over all. The cup shaped blooms are of heavy texture, and 4-5 open on a well arranged spike of medium height. The strong, healthy foliage adds more to its splendor. There is such a rich blending of these colors that no description can do this variety justice. It must be seen to be appreciated. As each floret opens it grows more rich in color and beauty. Watch for this beauty in our Exhibits in the coming Gladiolus Shows. Per ea., L \$5.00. M \$3.00. S \$2.00. Blts. 75c ea., \$5.00 dz.

3-4-6 may be purchased at 12 rate. No single item for less than 10 cents.

MIXTURES

We have long been noted for the excellence of our mixtures, stating, with reasonable assurance, that there are but few growers able to offer as varied and choice assortments such as we assemble. The bulbs are all 1 1-4 inches and over, and not the medium bulbs 1 inch or smaller, such as many offer at even greater prices. If you want medium bulbs, pay only what you should.

GARDEN MIXTURE

Composing many fine varieties, all colors. Splendid for a gorgeous garden display or flowers for cutting. \$2.00 per hundred, fifty for \$1.00 or 25c a doz. Medium bulbs \$1.25 per hundred.

PRIMULINUS MIXTURE

For daintiness and quality, there is nothing that can equal our Primulinus Hybrids. For table or interior decorating, they are unsurpassed. \$3.00 per hundred, fifty for \$1.50 or 50c doz. Medium bulbs \$1.50 per hundred.

OUR SEABROOK MIXTURE

Exhibition Types
